The silent slay the spire

The silent slay the spire builds. The silent slay the spire reddit. How to play the silent slay the spire. The silent slay the spire cards. The silent slay the spire tips. The silent slay the spire strategy. The silent slay the spire guide. The silent slay the spire tier list.

Slay the Spire is a difficult Roguelite game that can often go down to the best margins. As a result, it is important to make sure you use the most efficient builds possible for each of the four characters of the game. The observer was the fourth character to be added to the game and has a bunch that focuses on the generation of energy and the production of cards during combat. He starts the race with 72hp, and a bunch of 10 cards that includes four attack cards, four defense cards, an eruption and a watch. Here is our guide on the best buildings to use with the observer. 4 Ragnarok Build Recommended Papers: Ragnarok Flame Crown Deus Ex Machina Third Eye Fasting The Build Ragnarok aims to keep your bunch small and increase the block until you are able to launch a powerful attack that will sweep away the enemies in front of you. Ragnarok is the key to making a great use of this deck, inflicts five damage (you are updated) to a random enemy five times. If you combine it with the position of anger, which doubles all the damages suffered and received, you can inflict devastating damage to most enemies. Flame wreath is also a fantastic paper to use with Ragnarok, which adds five damage (six if updated) to your next attack, another 25 if you use it with the Ragnarok. Deus Ex Machina adds miracles to your hand; They provide extra energy that allows you to make more attacks. Third eye gives you seven blocks (nine if updated), as well as scry that allows you to look into your deck to choose the cards you want. Fasting can be useful, it removes a bit of energy but allows your attacks to inflict anymore adding three forces (four if updated). 3 Recommended Scry-Focused Build Cards: Weave Nirvana Foresight Just Lucky Third Eye As the name of this build clearly shows, it is based on the creation of Scry, which allows you to build Hand with more attention making you look through your deck to select the cards. And a €™ good construction for beginners, with some things to understand, but but Too complex. Weave is a fantastic card to this build, it offers four damages (six when upgraded) and every time you Scry returns to your Deck. Nirvana gives you four Blocks every time you Scry, building a decent amount of these allows you to easily accumulate Blocks every turn. Another useful card to collect is Foresight, it gives you Scry at the beginning of every turn, and it can be used to pull cards like Weave back from the discard pile and into your Deck. Cut Fate gives you Scry, deals damage, and even lets you draw a card. It is highly functional and helps to put the cards you need back into your hand. Only Lucky works the same way, it will give one Scry, two Blocks and three Damage (four when upgraded) which is useful to bring Weave back onto your Deck while still doing some enemy damage. 2 Pressure points Build recommended cards: Pressure points Inner Peace Come Water Meditate Deus Ex Machina This construction is based on having a small deck with the aim of accumulating pressure points and using them as often as possible. Pressure points apply Mark to enemies, damage is then dealt according to how much Mark each enemy has. It also makes sense to keep the position calm because no additional damage is granted by entering the position of Wrath. Calm tabs focused like inner peace, like water and the Mediterranean are great additions. Inner Peace allows you to draw three cards (four when you're upgraded) if you're in Calm. As if the water also relies on the Quiet Stance, it will give you Block if you are Quiet and is a big supporter of the defense for this construction. Deus Ex Machina adds miracles to your hand; They provide you with extra energy that allows you to keep using pressure points that cost only one energy. If you can get out of the calm position, cards like the Empty Body and the Empty Hand will put you back into the calm position, even though Block and breaking damage respectively. 1 Creation Build Recommended Cards: Master Reality Battle Hymn DECIVE REALITY SPIRIT SHIELD ESTABLISHMENT This construction is Around you filling your bunch with powerful cards but above all they have only one use. The main card of this deck is the master reality, one of the best cards to kill the spire, which makes you every card created to update automatically, when you can update it there is no cost to use it, allowing you to use More cards at every turn. The battle hymn costs an energy and adds a shot to your hand at the beginning of each turn, obviously this is an updated version of the card that inflicts 16 damage, but it is also maintained at the end of the tour. Trick reality is the defensive equivalent of the battle hymn in this build, it gives you four blocks and a security is added to your hand. Safety + gives you 16 blocks for each lap. The Spirit Shield takes four blocks for each card in your hand, this works particularly well with this build because you are so keeping so many cards in your hand every turn. Establishment is a very situational card but it is perfect for this construction, reduces the energy needed to use a kept card. The fact that this bouquet is built around using papers maintained makes it a child's play, and allows you to use many more moves per turn. Conjure Blade is one of the strongest cards of the game and is the bouquet clutch card. Recall an exponger in your hand, Expunger + inflicts 15 damage X times, with the number of times it depends on when the card has been played. As you can imagine, this attack is quite powerful to end the fighting between bosses, not to mention normal combat situations.
